We are an independent unit of local government
Water and other natural resources
actively promoting the responsible use of land.

Program made possible by
San Diego County Water Authority
San Diego County Smart

Free Irrigation Evaluation
understanding of their crop water needs.

The mission of the San Diego County Resource Conservation District is to promote the wise use of local natural resources by providing technical assistance and financial incentives to landowners.

By Mission's Free Irrigation Evaluation program, we help landowners make the switch to more efficient irrigation systems, reducing water use and protecting the environment.

Your irrigation system is designed to meet your specific water needs. A professional irrigation evaluation can help you identify areas where water can be conserved.

Call today at (760) 728-1332 to schedule your free irrigation evaluation.
